

Platinum CARE Service Plan Description

We provide small and mid-sized companies the information technology (IT) advantages of big companies, so you'll get the most from your technology investment – guaranteed!

VM Systems offers Platinum CARE service as an annual service to local clients having systems with 21 – 40 computers.

Our “Value Method” Approach

Our Value Method brings a level of professionalism and manageability to your internal systems, helping you use IT as a strategic tool in your business.

We begin with an annual audit which helps us to help you:

- ✓ understand what you have
- ✓ identify needs and risks
- ✓ establish a recommended action plan

Upon completion of the audit and presentation of the audit report we work with you to prepare an annual plan for your business.

This plan may be as simple as providing on-site support for ½ day each week, or rectifying risks identified during the audit, or the implementation of a strategic project such as designing and deploying a website that ties-in with in-house systems.

Satisfaction Guarantee

Complete client satisfaction is our goal, and we believe in this so strongly that we will back it up with a guarantee – in writing. If you are not satisfied with our service for any reason, let us know. If we have not rectified the problem to your satisfaction within two weeks we will refund a portion of your annual Platinum CARE service fee.

Response-Time Guarantee

If you have a systems emergency that is impacting your business we will respond within two hours. If we fail to

respond within two hours, the first two hours of service to resolve the problem are on us.

Our Annual Audit

Once each year VM Systems conducts a comprehensive systems audit, along with a management report, that addresses the following:

- ✓ comprehensive hardware and software inventory
- ✓ software license inventory by computer (discrepancies will be identified)
- ✓ power and battery-backup audit
- ✓ backup and recovery audit
- ✓ firewall integrity report (for clients with internet access)
- ✓ basic systems security audit
- ✓ operational procedures audit, including:
 - ✓ backup procedures
 - ✓ new hire/termination checklists
 - ✓ hurricane preparedness checklist
- ✓ applications inventory
- ✓ risk assessment

Our annual audit includes a 90 minute management presentation, scheduled after the audit report is prepared.

On-Site Support

In addition to the annual audit, Platinum CARE clients are allotted 25 days per year for on-site support. This time can be assigned in a flexible manner based upon the annual audit and a jointly developed action plan.

The time can be allotted to periodic on-site support (e.g. ½ day per week) or applied towards specific projects on the action plan. Any allotted time not used by the end of the year is automatically rolled-over into the following year.

Platinum CARE Service Plan Description

Remote Support

Platinum CARE service clients are entitled to unlimited remote email and phone support .

24 x 7 Support

Platinum CARE service clients are eligible for 24 x 7 support on an emergency business (up to 2 incidents per year).

Web and Email Hosting

Platinum CARE service plan clients have access to web site and email hosting provided by VM Systems. The Platinum hosting plan includes:

- ✓ up to four websites with 1GB combined storage
- ✓ 10GB traffic per month
- ✓ 40 POP/IMAP email accounts (unlimited aliases)
- ✓ self-service administrative web console
- ✓ remote mail access via the web (webmail)
- ✓ SPAM detection at the server
- ✓ SSL (secure website traffic if required, client SSL certificate procured and installed at cost)
- ✓ Domain Name Service for up to 4 domains
- ✓ PostgreSQL / MySQL database
- ✓ MS FrontPage Server extensions
- ✓ CGI, PHP and SSI

Additional Services

Platinum CARE service plan clients can obtain additional services at hourly rates.

We also offer off-site secure internet backup, up to 5GB is included as a standard offering.

24 x 7 support is provided for emergency problem resolution.

We can also undertake larger strategic projects for clients such as systems integration or custom solution development.

Billing and Reporting

Client bills include an activity statement for the previous period as well as a year-to-date summary detailing time and incidents used and available.

Talk to us about our flexible payment plans.
